# Ilyass

Electrical & Embedded Systems Engineering Student

i.chikhi2005@gmail.com · Clermont-Ferrand, France

Fourth-year Electrical Engineering student at Polytech Clermont INP, seeking a 4-month internship starting in April 2027. Practical experience in PCB design, circuit assembly and testing, C programming, and industrial electrical installations. Interested in embedded systems, power electronics, and industrial automation.

## EDUCATION

**Polytech Clermont INP — Clermont-Ferrand, France** 2024–2028

Engineering degree in Electrical Engineering (Master's level), expected 2028

- Coursework: Power Electronics, Embedded Systems, Industrial Electrical Installations, Applied Mathematics.

**CPGE, Lycée Claude Gellée — Épinal, France** 2022–2024

Two-year intensive preparatory programme for engineering schools

- Mathematics, Physics and Engineering Sciences.

**Lycée Technique Moulay Youssef — Tangier, Morocco** 2022

Scientific Baccalaureate — Mathematics B

- Main subjects: Mathematics and Physics.

## PROFESSIONAL EXPERIENCE

**EM Energie — Tangier, Morocco** Jul–Aug 2024

Electrical Engineering Intern

- Drafted and updated electrical layout plans and 2D/3D models in AutoCAD for industrial buildings.
- Contributed to sizing and routing studies for MV/LV transformer substations, distribution boards and industrial safety networks.
- Used DIALux to assess lighting levels and uniformity in production areas.

## TECHNICAL PROJECTS

**Breadboard Power Supply PCB** 2025

PCB design, assembly and testing

- Designed and routed a PCB providing 5 V and 3.3 V outputs for breadboard prototyping.
- Selected regulators, capacitors and indicator LEDs, considering current limits and heat dissipation.
- Soldered components and tested continuity, output voltages and operation under load.

**30 V DC–DC Boost Converter** 2025

Circuit design, assembly and testing

- Designed and built a DC–DC boost converter targeting a 30 V output.
- Calculated duty cycle and component values; selected the MOSFET, inductor, diode and filtering capacitors.
- Assembled the circuit and measured output voltage, ripple and behaviour under different loads.

## TECHNICAL SKILLS

**Electrical:** LV/MV distribution, transformer substations, industrial lighting.
**Electronics:** DC–DC converters, schematic design, PCB layout, soldering, oscilloscope and multimeter measurements.
**Embedded:** C programming, assembly, digital electronics, FPGA basics.
**Software:** AutoCAD, DIALux, e² studio, Intel Quartus, LaTeX.

## LANGUAGES & INTERESTS

**Languages:** French C1 (DALF) · English B2 (TOEIC) · Arabic native
**Activities:** Taekwondo (6 years), kickboxing (5 years, competitive practice)
**Interests:** C programming, applied mathematics and electronics projects.
